Table 2: shows our transfusion rates in all surgeries performed by Dr De Smet at the Anca Clinic (AZ Jan Palfijn hospital) in Ghent, The numbers include all patients treated for any type of hip pathology with either a unilateral or bilateral resurfacing, a total hip replacement or a hip revision surgery

BS = Bilateral Simultaneous

MTR = mean transfusion rate in units Packed Cells per patient

TPT = Transfused patients

UPC = Amount of units Packed Cells

* patient number, prostheses number = x 2
